# How to safeguard the environment without compromising hydropower production in Norway?

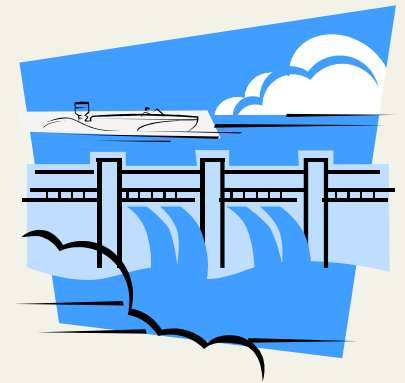

World Water Week, Stockholm 2014

Pernille Lund Hoel

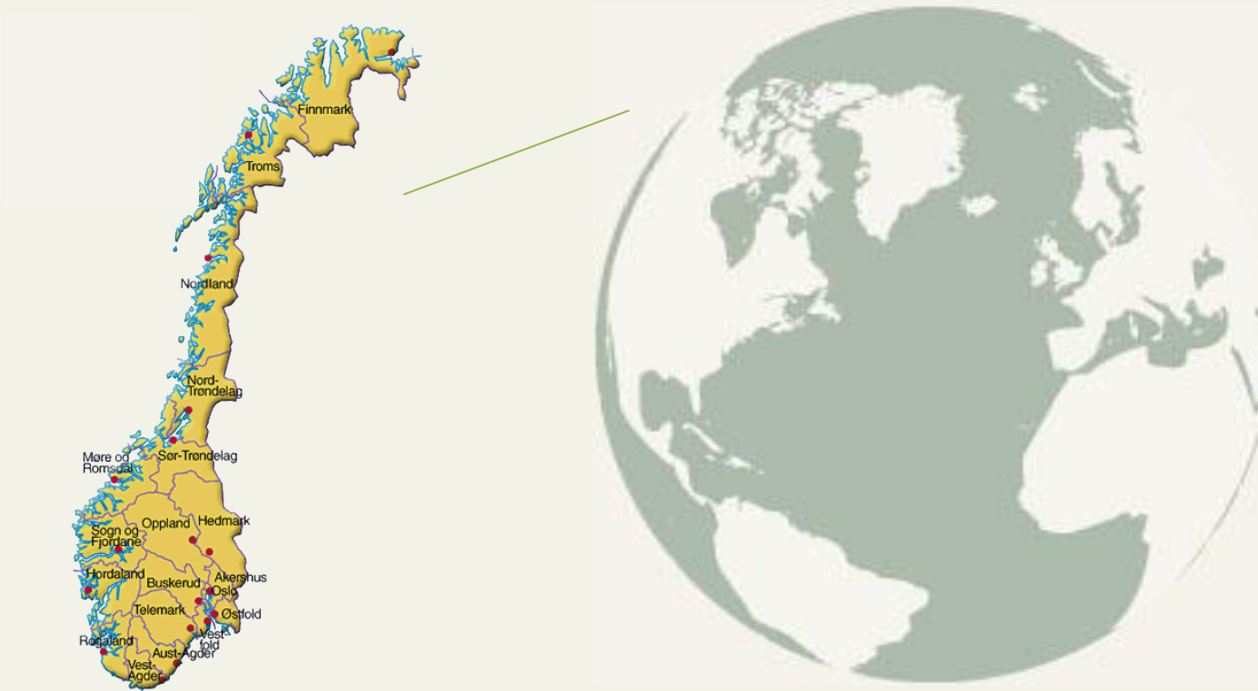

Advisor in biodiversity and energy

WWF-Norway

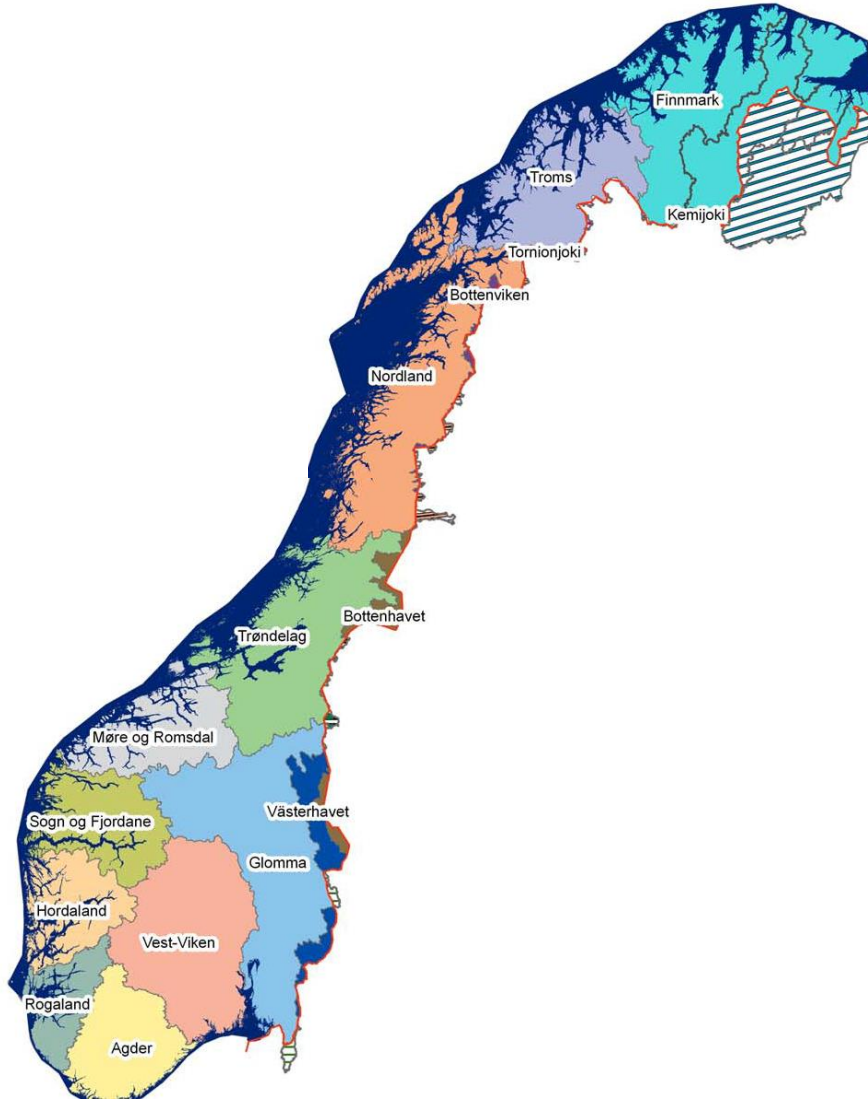

# Norway`s role towards a renewable society

---

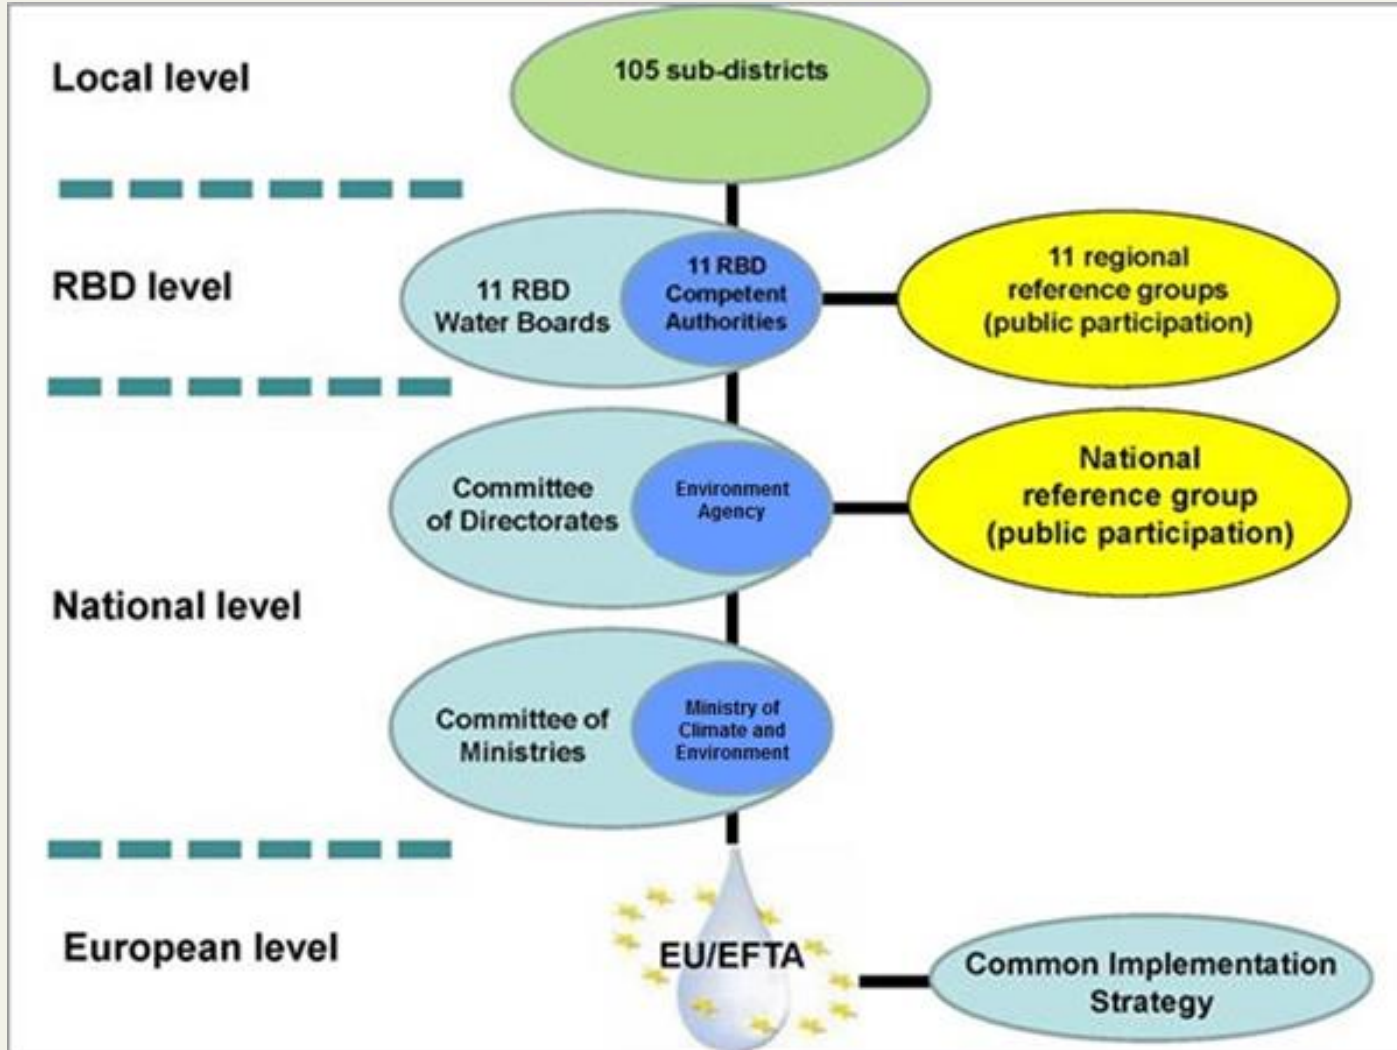

# Implementatin of the WFD in Norway

Norway harbors 17 River Basin Districts (RBDs)

- 11 are international (IRBDs)
- 6 are purely Norwegian
- 5 are mainly Norwegian

# A crucial year ahead!

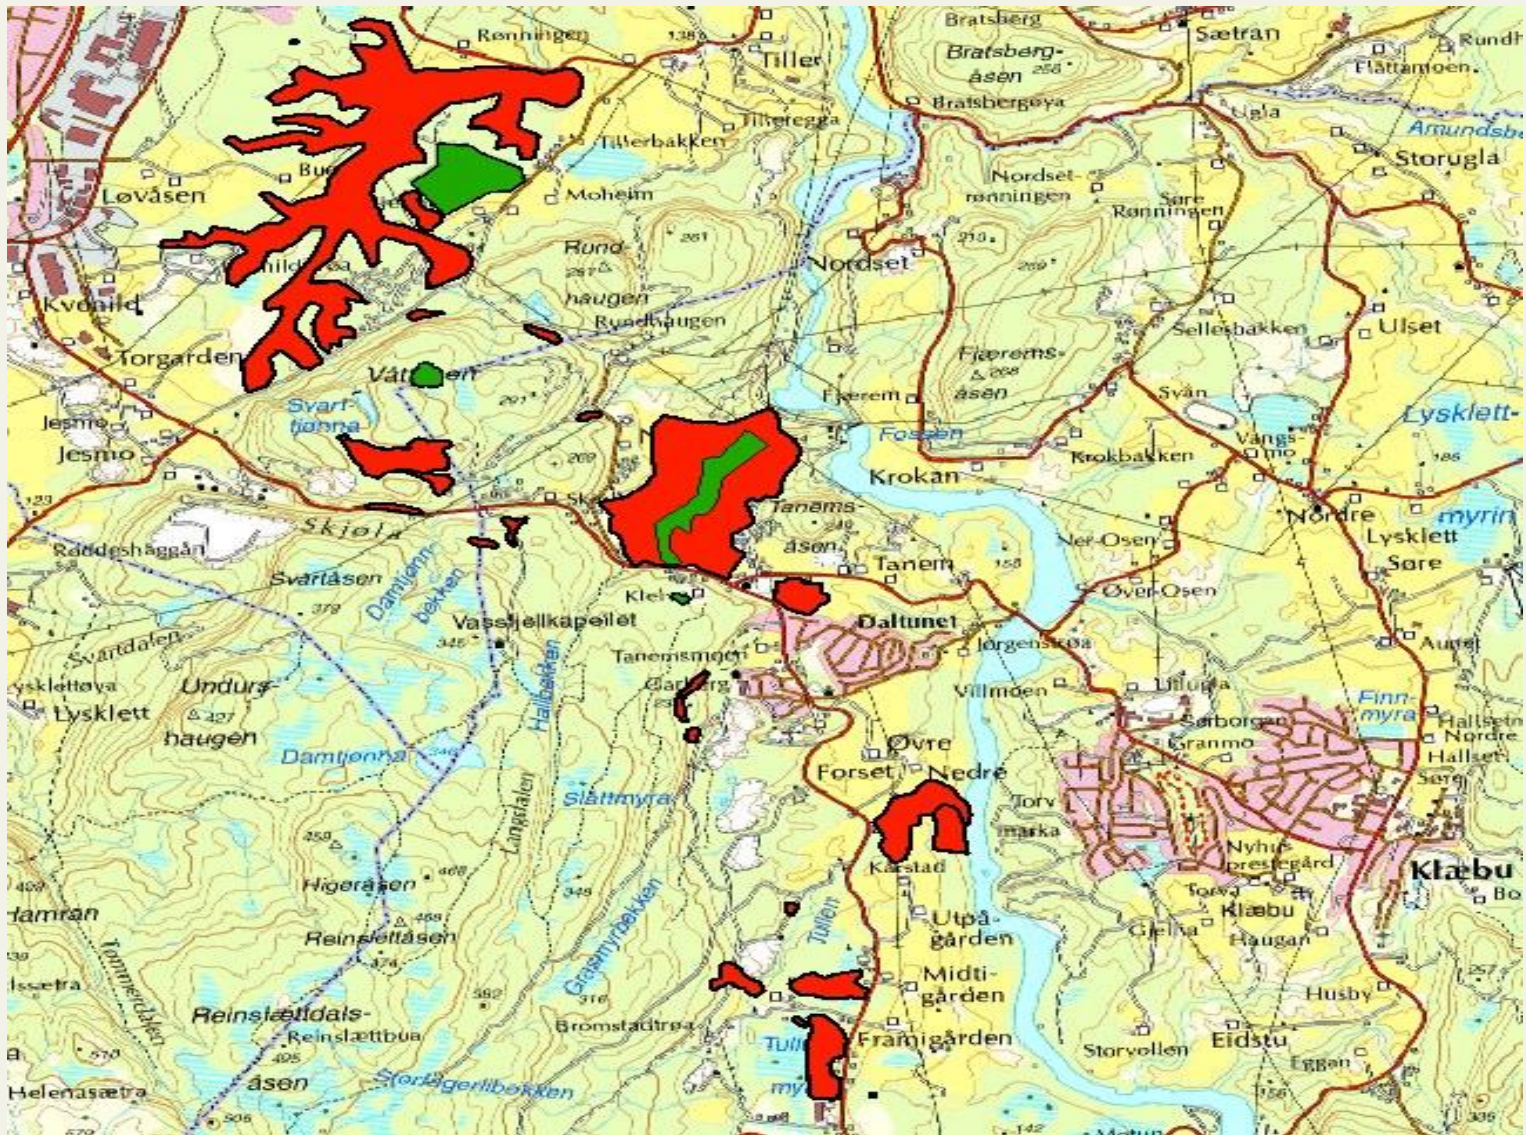

# Challenges in the Norwegian water management

- Political priorities
- Costs of mitigating measures
- Long revision-interval
- Lack of knowledge

# Knowledge-base: 75 % is lacking

# NGO-complaint to ESA

# How can Norway safeguard the environment...

Photo: Naturvernforbundet

## ...without compromising hydropower production?

- Prioritizing «win-win» cases through upgrading of installations in old power stations
- Implementation of best environmental standards in new projects
- Holistic approach; both new projects and revisions
- Implementation of standard «nature management-conditions» in all licences

*Thank you for your attention!*
